

HIGH PERFORMANCE SILICONE SPRAY

Product Information

Formulated for Injection Molders and Vacuum Formers

12oz.net wt.
(16oz can size)

High Performance Silicone Spray is used in many areas to prevent sticking and allow materials to slide more easily. **High Performance is used by Injection Molders as a Release Agent for Plastics and other materials.** Its **Super Fast Drying System** provides **excellent coverage** on the entire mold, allowing for easy release of formed parts. High Performance Silicone Spray is **Non-Flammable aerosol** and Does Not contain CFC's or any Class I or II Ozone Depleting Chemicals.

Features

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> • Prevents Sticking • Extremely Fast Drying • Reduces Clean-up Times • Non-Flammable | <ul style="list-style-type: none"> • Excellent Release Agent • Provides Slide • Food Grade Approved • Odorless |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|

Provides multi-part releases per application.

Formulated for Injection Molders & Vacuum Formers

Food Grade Approved – meets H1 specifications for incidental contact.

PROPERTIES

| | |
|---------------------------|-----------------------------------------------------------------------------------------|
| Can Size | 16 oz. |
| Net Wt. | 12 oz. net wt. |
| Packing | 12-16 oz (12 net oz.) cans per case |
| Weight per case | 13 lbs. per case |
| Active Ingredients | Pure Dimethyl Silicone Fluid Does not contain Chlorinated Solvents |
| Non-Flammable | Classified as Non-Flammable by ASTM Testing Method D3065-01 |
| Food Grade | Meets H1 specifications as a lubricant for incidental contact with food. FDA 21 CFR |
| CAS Information | Halogenated Hydrocarbon/ Ether Blend Mixture NJ Trade Secret Registry 80100382-5001p |

HOW TO USE

Spray a fine mist on the area to be treated. The Highly Atomized Particles dry immediately to a “slick” surface, allowing the material to slide or release.

Uses Include

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none">• Excellent Release Agent for Injection Molders• Prevents food from sticking to conveyors, ovens, freezing trays, baking tins, knives, cooking coils, evaporators & other processing equipment• Prevents sticking on chutes, bins, walls and surfaces. Keeps material moving and prevents adhesion of greases and oils.• Lubricates surface of wood, metal, plastic, vinyl, rubber, leather etc.- eliminates squeaking | <ul style="list-style-type: none">• Eliminates carbon build-up on sealers and allied equipment. Materials will not adhere.• Protects machines from acid build-up, rust and other foreign elements• Prevents glue from adhering and eliminates sticking when sprayed on rails, belts, stamps and grip fingers of labeling equipment.• Allows cellophane, pilofilm, saran and vinyl polyethylene to move freely over sprayed surfaces. |
